

POWERING CANADA'S FUTURE

DECEMBER 2011

Canada's current installed capacity:

5,265 MW

Across Canada, electricity generated from wind is already powering over 1.2 million homes and businesses in a clean, reliable and efficient manner. With Canada's unparalleled wind resource, there are still opportunities to do more to maximize the economic, industrial development, and environmental benefits associated with wind energy for Canada.

- 690 MW of new installed capacity in 2010
- New wind farms in British Columbia, Alberta, Ontario, New Brunswick and Nova Scotia
- 2011 is projected to be a record year for wind in Canada with more than 1, 000MW likely to be installed
