

Wind. For my community.

Today, wind is providing clean, reliable and safe energy to over 1.2 million Canadian homes – creating social, economic and environmental benefits for all Canadians.

The 99MW Erie Shores Wind Farm – located along 26 kilometres of Lake Erie shoreline – provides hundreds of thousands of dollars in tax revenue, increased tourism, and jobs for local residents.

“The turbines in my community have boosted room rentals through new tourism as well as wind farm workers staying for extended visits.”

—Jim Hevenor, owner of Grey Gables Bed & Breakfast, Port Burwell, Ontario

A recent Ipsos-Reid survey found 89% of Ontarians support the production of wind energy in their region of the province.
