

(NEW) CanWEA Operations and Maintenance Program

With over 11,200 MW of installed capacity and many more wind farms set to come online in the next few years, responsible and sustainable operations of wind farms has emerged as a critical topic among key stakeholders in the Canadian wind energy sector.

In order to ensure the efficient and profitable operation of those assets, as well as the health and safety of workers who operate and maintain them, we encourage you to take part in the new Canadian Wind Energy Association (CanWEA) Operations and Maintenance Program. This Program will bring together stakeholders to address key challenges facing Canadian wind farm operating communities. The Program provides an effective platform for networking and knowledge sharing amongst operations and maintenance (O&M) professionals.

Some of the key topics and areas of focus for the Program and its participants include: benchmarking data; health and safety best-practices; improved networking; and information sharing initiatives amongst O&M professionals on topics such as wildlife and the environment for example.

A company must be a **Leading Edge, Champion or Advocate** CanWEA corporate member in good standing in order to be eligible to participate in this exclusive CanWEA Program.

Pricing is as follows:

CanWEA Membership Level	Annual Fee
Leading Edge	Fee waived – included as part of CanWEA's Leading Edge corporate membership benefits.
Champion	\$2,500
Advocate	\$5,000
Basic	Not eligible
Associate	Not eligible
Individual	Not eligible
