

Take Action!

Let your voice be heard!

Your voice counts as we invest in building a newer and cleaner power system that creates jobs, delivers significant economic benefits to local communities, and is also safe and affordable.

Write to your local representatives

You can take action right now and show your support for wind energy by sending a letter to your government representative and asking them to support wind energy and the policies that will help it continue to grow.

Follow the guidelines outlined in the *Communities/Take Action* section of the CanWEA website to let your provincial representative know that clean and renewable energy is important to you!

Submit a letter to your local newspaper

You can also write a letter to the editor in your local community newspaper to help raise awareness, correct misinformation and voice your opinions.

Together we can ensure that Canada is a world leader in the development of clean, affordable wind energy.

Do you need help finding your local community newspaper?

Consult the Newspapers Canada website at www.newspaperscanada.ca/database to find community newspapers in your area.

Check out WindFacts!

The *WindFacts* area of the CanWEA website contains facts and resources that address a number of areas of key interest to Canadians – how wind works, affects health, the environment or wildlife and provides local benefits.

Visit canwea.ca/wind-facts today to get the facts on wind energy and join the conversation.

Find out about Canada's Wind Markets!

If you are interested in learning more about wind energy costs, Canada's installed wind capacity or different provincial market landscapes, check out the canwea.ca/wind-energy section.

Wind for my community!

To see and hear real stories from individuals living near wind farms, visit canwea.ca/communities.

Mark your calendar for Global Wind Day

June 15 is Global Wind Day – a day to show your support for wind energy. Wind energy is one of the fastest-growing energy forms, and one of the lowest-cost ways to generate electricity, around the world. All year round, keep an eye on the [Global Wind Energy Council](#) and its members to see how wind energy is transforming electricity grids and addressing the challenges of climate change in more than 80 countries worldwide.

Get involved!

CanWEA shares a common commitment to Canada's prosperous transition to clean energy with a network of organizations actively engaging with Canadians to improve energy literacy and facilitate a national conversation on Canada's energy and climate change choices. Check out the list of our partners at canwea.ca/partners and get involved!
